## 30 Ton Rapid cycle tube pulling system

The hollow rod cylinder uses a collets system that grips the pulling mandrel and subsequently the tube for continuous pulling rates up to 3 meters per minute. When the pulling cylinder reaches the end of its travel it automatically retracts at increased speed for the next cycle.

Can be purchased with or without trolley. Hydraulic power unit is removable from Trolley Pulling gun rests in cradle in Trolley

Pulling cylinder is fitted with bridle for use with spring balancer. Specify vertical or horizontal application.

Improved Hydraulic circuit uses fewer components for reduced heat generation and ease of service.

Improved electrical circuits for reliability, and service diagnostics.

Electrical console is sealed from harsh environment in lockable cabinet separate from HPU tank

All control functions are 24-Volt remote pendant on 6-meter cable

### Functions

- Pull / Jog
- Retract / Jog
- Pull / Automatic
