Clamshells

Description

DLR's Clamshell lathes are portable pipe cutting machines designed for accurate on-site severing, bevelling, ID boring, facing and O.D turning. These clamshells are available in a wide range of sizes and the split ring assembly provides them with the capability of being mounted around in-line piping. DLR's cutting tool bits are available for severing, severing and double bevelling, severing and bevelling on the side of the cut on which the clamshell is mounted (right hand), severing and bevelling on the opposite side of the cut (left hand), counter boring, socket weld removal, etc. Clamshells can be used in any environment making them perfect for underwater, petrochemical or other hazardous conditions.

Model	Size Inches	Size mm	A	B	C	D
MC-2	0.84-2.37	21.3-60.3	163 mm	82 mm	48 mm	109 mm
