 3 only Clamps for securing Supports and Mount
 Set of Centering Cones, ranged 50mm-150mm
 Instructional videotape
 Aluminum heavy duty Check Plate Storage Box

*Specifications subject to change without notice.

Description

Versatility, ease of maneuverability and operation, and a proven track record translate into increased profitability for owners of B&D line borers. The 2500 Electric Drive is a portable, rugged and reliable thru bar design that allows for the drive unit to setup anywhere along the bar including between bores with as little as 10" clearance required between bores. The EV-2500 is equally suited to on site and in shop operations. The variable speed range (15 rpm to 170 rpm) ensure a wide range of applications and can be supplied with variable electric feed (Variable feed rate from 0-50mm per minute) or a fixed mechanical feed (Mechanical fixed rate at .011mm (.0045") per revolution) The adjustable mounting system is designed for operator ease. All B&D Boring Bars are chrome plated for extra hardness and straightened for improved machining. Alternate length bars are available along with a range of accessories that include, Facing Head, Bar Coupler, Over Bar Micrometer, Micro Adjuster Tool, Thru Bar Micrometer and automatic ID welding systems.
