

The Top Gun For Power Plant Tube Cleaning

The QS-300 tube shooter eliminates deposits in a fraction of the time.

QS-300 – State-of-the-Art

The Quick Shot® Condenser Tube Cleaning Gun will outshoot the competition when it comes to high volume tube cleaning jobs. The only thing more impressive about its leading-edge technology is the time you'll save while using it. With projectiles for every application propelled by the unit's in-line pressurized water, tube deposits simply don't stand a chance. Just insert the appropriate projectile into the tube followed by the QS-300 tapered nozzle, pull the trigger and you're left with an astonishingly clean tube in mere seconds.

FEATURES

- > Compact
- > Power assisted trigger
- > Automatic pressure relief system
- > Rugged construction

↑ AIR

↑ WATER
