Quick Connect Couplings—Engineered To Save Time
COMPATIBLE WITH BOTH OLD AND NEW MACHINES

QUICK CONNECT SHAFT Coupling
All Goodway flexible shafts are now manufactured using the faster “Quick Connect Shaft” design. No more lining up and screwing on the disconnect nut as with the old style machines and shafts. All Goodway tube cleaning machines are now shipped with the new manifold quick connect design. The shafts simply snap into place saving valuable time during set up. For existing Goodway tube cleaning machine users there is no need for any kind of adapter or modification. The “Quick Connect Shaft” can also be retrofitted to older machines with an existing thread on manifold connection.

FEATURES
- Faster, easier shaft connection saves time
- Securely snaps into place
- Quick release disconnect
- Works with older style Goodway tube cleaners
- No modification necessary
FLEXIBLE SHAFTS – Leading the industry

Goodway’s exclusive Quick Connect Shaft coupling and Quick Connect Tool coupling allow you to connect to the tube cleaner and change brushes up to 30 times faster than standard threaded shaft couplings—no more threaded couplings. Quick Connect shafts feature a tough abrasion resistant casing designed to withstand harsh industrial environments. The high visibility blue nylon exterior reduces tripping hazards for added safety.

The shaft’s unique strain relief system is custom-molded with a variable thickness to allow for a gradual radial bend that is far superior to a spring or coiled wire. A galvanized spring steel core comprised of multiple counter rotated windings provides unmatched performance. Shaft life is increased with the use of a self-lubricating shaft insert for reduced friction and extended durability. A repositionable shaft stop lets you know when the end of the tube has been reached.

**FEATURES**

> Quicker brush change saves time
> Brushes can not twist off shaft with machine in reverse
> No tools required to change brushes

**Note:** Look for this symbol for Quick Connect Couplings.

Flexible Shaft Cutting and Crimping Press:
The Flexible Shaft Cutting and Crimping Press is specifically designed for use with Goodway GTC-701, GTC-702 and GTC-703 Flexible Shafts. This unique tool will allow the user to quickly cut and repair flexible shafts in the field without the use of any other tools.

**Note:** Crimping dies not included. Order crimping dies below.

- **DIE-SET-701** Dies for GTC-701 Flexible Shafts
- **DIE-SET-702** Dies for GTC-702 Flexible Shafts
- **DIE-SET-703** Dies for GTC-703 Flexible Shafts

Flexible Shaft Lubricator: The Goodway Flexible Shaft Lubricator allows for fast, easy protection of flexible shafts in between uses. Simply fill the lubricator with water-soluble lubricant, connect the flexible shaft and attach a compressed air line (maximum 150 PSI – quick connect fits Goodway air line #ASH-B50-A – see page 21). The flow of air and lubricant displaces water and coats the shaft core to protect it from harmful rust and corrosion. Lubricant flushes out with water when shaft is used again.

- **GSL-705** Flexible Shaft Lubricator with quick connect
- **GSL-LU1** Lubricant for flexible shaft lubricator, 16 oz

Crimping Block: Goodway’s Crimping Block provides the user with quick, convenient methods for performing repairs of flexible shafts in the field. Used properly, each will permanently attach repair couplings, extending the life of the flexible shaft while reducing downtime when a repair is needed.

- **GTC-CT5** Crimping Block with punch
- **GTC-CTP** Replacement Punch
Flexible Shaft Repair Couplings:
Coupings are available for quick connect and standard threaded shaft. Please check your shaft before ordering.
