

MODEL 1500 AND 1500 API PATENTED HYDRAULIC FLANGE SEALS

01 | 2015
M600

Patented Hydraulic Flange Seals

Benefits

Our Model 1500 Series Patented Hydraulic Flange Seals (HFS) clamp the opposite end of flanged valves. Shell testing can be performed when used in combination so the valve does not have to be blind flanged or turned over and re-clamped for seat testing. The Model 1500 HFS compliment our Model 1200 and 1400 series valve testers, as well, as being used as a standalone component for pressure testing. The Hydraulic Flange Seals clamp on the back side of flanges for an easy, quick and safe way to seal and test valves, pipes, vessels or any other component with a flanged outlet.

CLIMAX Training Facilities

CLIMAX has been teaching the fundamentals and fine points of portable machine tool operation for practically as long as we've been inventing and building the tools.

We offer several training facilities across the United States - the Global Learning Center, situated in our corporate headquarters near Portland, Oregon, our New Hampshire Training Facility, and our Houston Training Facility. All facilities offer training for machine tool operators on safety and machine setup and operation. Trainees also receive technical tips and tools to improve operational efficiencies, with the vast majority of every program devoted to hands-on activities and skill development.

The CLIMAX instructional team includes specialists in shipbuilding, power generation, civil engineering, bridge re-building, petrochemical and other industries.

Whether it's a regularly scheduled course at one of our training facilities, or custom curriculum conducted at your facility, your machinists will benefit from courses developed by some of the most respected authorities in the business.

Call us today to register for a regularly scheduled class, or talk to us about how we can customize a training program for your specialized application.

CLIMAX GLOBAL LOCATIONS
